

SALEHA IFTIKHAR

+1 (718) 551 5561 | salehaiftikharrr@gmail.com | saleha.live | [LinkedIn](#) | [GitHub](#)

AI-native engineer who builds autonomous agents and full-stack products end-to-end, with a genuine record of nonprofit and community impact.

EDUCATION

Gettysburg College

Bachelor of Science, Computer Science; Minor in Mathematics; Minor in Data Science

Aug 2022 – May 2026

Gettysburg, PA

- **Achievements:** Eisenhower Scholar, Dean's Honors List, Pi Mu Epsilon (Math Honor Society), Keith Pappas Memorial Award (Fall 2025), Linnaean Award (Spring 2026)
- **Coursework:** Data Structures & Algorithms, Databases, AI, Data Science Programming, Linear Algebra, Probability & Statistics

SKILLS

- **AI & Agentic Coding:** Claude, Claude Code, Claude API, Vercel AI SDK, autonomous agents, LLM evaluation, eval-gated outputs, MCP, prompt-driven development
- **Languages:** Python, Java, JavaScript, TypeScript, Ruby, PHP, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Next.js, Ruby on Rails, Express.js, Node.js, Tailwind CSS, Streamlit, Chart.js
- **Databases & ML:** PostgreSQL, MySQL, Supabase, Drizzle, NumPy, Pandas, Seaborn, scikit-learn
- **Cloud, DevOps & Testing:** Docker, Kamal, CI/CD, Git, REST APIs, JWT, RSpec, Vitest, RuboCop

TECHNICAL EXPERIENCE

Software Engineer

SuperOrgs (Early-Stage Startup)

Jun 2026 – Present

Remote

- Wear multiple hats on a small startup team: ship my own features in React and TypeScript (Drizzle, PostgreSQL), and review and approve teammates' pull requests behind CI gates that catch issues before merge
- Enabled admins to bulk-archive and mass-reassign across departments by engineering a unified management dialog, and restored tenant-scoped data by fixing a multi-tenant notifications bug at the database query layer
- Drive agentic coding workflows with Claude Code to ship faster and own architecture, and contribute beyond engineering through product research and promotion that shaped the feature roadmap

Technical Project Manager

Infrastructure and Computing Office, Gettysburg College

Jan 2026 – May 2026

Gettysburg, PA

- Led a 3-member team and external vendor (Velaspan) on a campus-wide WiFi analysis, processing scan data with Ekahau and Python (NumPy) to inform upgrades that improved network reliability
- Automated permission-tracking and scheduling for site surveys across 30+ buildings with Python and Pandas, and translated student feedback sessions into actionable recommendations

Software Developer

Impact Rehab

Aug 2025 – Dec 2025

Gettysburg, PA

- Engineered a full-stack physiotherapy app (PHP, JavaScript, MySQL) that automated MSK score calculations previously done by hand, removing manual scoring during patient evaluations, with JWT authentication and real-time Chart.js dashboards
- Led a 3-member team through the full SDLC and owned client communication with a Virginia physiotherapy practice, delivering the production app on schedule

Web Development Intern

Enlisted Association of the National Guard (EANGUS), a National Nonprofit

May 2025 – Aug 2025

Washington, DC

- Built a custom WordPress plugin (PHP, JavaScript, MySQL) for this nonprofit advocacy organization, centralizing 1,000+ leadership records across five directory sections and cutting record-lookup time by about 30%
- Created responsive web pages (TypeScript, Next.js) and interactive Chart.js visualizations to broaden stakeholder reach and support the nonprofit's advocacy and fundraising

PROJECTS

Forge & Autonomous "Minions"

TypeScript, Claude API, autonomous agents, LLM evals, GitHub / Slack / Linear APIs

Jun 2026

saleha.live

- Built an agent that generates, tests, and self-repairs other agents, plus autonomous "minions" that fix GitHub and Linear issues and open verified pull requests, dispatched from a Slack bot
- Designed a verification gate and a labeled eval set that measured zero unsafe ships: the agents never shipped work that failed tests or regressed existing behavior

Analytics Chat Assistant

Next.js, TypeScript, Claude API, PostgreSQL, Vercel AI SDK, Docker

Mar 2026 – May 2026

Gettysburg, PA

- Built a chat-native BI tool that turns natural-language questions into streamed charts and KPI cards, with an LLM generating validation-gated single-SELECT SQL over a read-only PostgreSQL role, a swap-in Claude or GPT provider, and a 25-case eval harness

Application Tracker

React, Vite, Supabase, Chrome MV3, TypeScript

Mar 2026 – May 2026

Gettysburg, PA

- Built a full-stack job tracker with authentication and filterable tables, plus a Chrome MV3 extension that scrapes 6 ATS platforms (LinkedIn, Greenhouse, Lever, Ashby, Workday, SmartRecruiters) into a profile-based autofill engine

LEADERSHIP & COMMUNITY IMPACT

Science and Innovation Research Undergraduate Fellow, Eisenhower Institute

- Selected as a senior fellow leading year-long public policy programming on science and innovation across Gettysburg, Washington D.C., and Japan

Aug 2025 – May 2026

Gettysburg College

Resident Assistant & Coordinator (Residential Education); Tour Guide & Student Ambassador (Admissions)

Feb 2023 – May 2026

Gettysburg, PA

- Trained, mentored, and supervised 6 RAs and supported 35+ first-year students; led monthly floor meetings and resolved conflicts to build self-sustaining communities
- Guided campus tours and information sessions, translating complex topics for non-technical, first-time audiences

Founder, Home Baking Business & Weekly Community Food Drives

- Built a home baking business and reinvested its profits into weekly food drives feeding 30 to 50 people in need

Jan 2018 – Aug 2022
